## General Guide

- Press © to change from mode to mode
- In any mode (except when a setting screen is on the display), press (L) to illuminate the face of the watch.

E-6

## Timekeeping

3. When the setting you want to change is flashing, use (D) and (B) to change it as described below.

| Screen: | To do this: | Do this: |
| :---: | :---: | :---: |
| 35 | Reset the seconds to $\mathbf{T E}$ | Press (D). |
| $17$ | Toggle between Daylight Saving Time (gif) and Standard Time (af) | Press (D). |
| $917.50$ | Change the hour or minutes | Use ( D) (+) and (B) (-). |
| 1 fl | Change the year | Use ( ${ }^{\text {( }}$ (+) and (B) (-). |
| 6-7t | Change the month or day |  |

4. Press (A) to exit the setting screen

- The day of the week is displayed automatically in accordance with the date (year
- See "Daylight Saving Time (DST) Setting" below for details about the DST setting

## Operation Guide 3408

To toggle between 12-hour and 24-hour timekeeping
In the Timekeeping Mode, press (D) to toggle between 12-hour timekeeping and 24 -

- With the 12-hour format, the $\mathrm{P}(\mathrm{PM})$ indicator appears to the left of the hour digits for times in the range of noon to 11:59 p.m. and the A (AM) indicator appears to the left
of the hour digits for times in the range of midnight to 11:59 a.m.
- With the 24 -hour format, times are displayed in the range of 0:00 to 23:59, without any indicator.
- The 12 -hour/24-hour timekeeping format you select in the Timekeeping Mode is - The A and P Pindicators ar.

Countimn the Timekeeping Mode time on the Countdown Timer Mode and Dual Time Mode screens.

## Daylight Saving Time (DST) Setting

Daylight Saving Time (summer time) advances the time setting by one hour from Standard Time. Remember that not all countries or even local areas use Dayligh Saving Time.

To toggle the Timekeeping Mode between DST and Standard Time

1. In the Timekeeping Mode, hold down (A) until the seconds start to flash, which indicates the setting screen.
2. Press (C) once and the DST setting screen appears 3. Press (D) to toggle between Daylight Saving Time (an displayed) and Standard Time (EF displayed) Press (A) to exit the setting screen.
The DST indicator appears on the Timekeeping and Alarm Mode screens to indicate that Daylight Saving Time is turned on.

Stopwatch
The stopwatch lets you measure elapsed time, lap times,
split times, and two finishes. Lap times and split times can
be stored in memory.

- The display range of the stopwatch is 99 hours,
59 minutes, 59 seconds.
- All of the operations in this section are performed in the
Stopwatch Mode, which you enter by pressing (C) (page
frecords
- The stopwatch measurement operation continues even if you exit the Stopwatch Mode.
- For information about how stopwatch times are stored in memory, see "Memory Management" (page E-19).

## Viewing the Stopwatch Displays

The information that appears in the watch's upper and lower displays depends on whether you are measuring lap times or split times.
Lap Time Measurement
Upper Display: Lap time
Lower Display: Elapsed time
Split Time Measuremen
Upper Display: Lap time
Lower Display: Elapsed time (Split time appears here for eight seconds as it is stored in memory.)

- See "To measure elapsed time with lap times" (page E-15) and "To measure elapsed time with split times" (page E-17) for more information about each type of measurement
- You can perform elapsed time measurement starting from either the lap time screen or the split time screen (pages $\mathrm{E}-15$ and $\mathrm{E}-17$ ). Whenever you enter the Stopwatch or the spit time screen (pages E-15 and E-17). Whenever you enter the Stopwatch Mode, the screen (lap time or spit time) that was displayed when you last ex
mode will appear first. minutes, seconds, and a $1 / 100$-second value. This changes to hours, minutes, and seconds when the time in the upper display exceeds 60 minutes.
- The lower display initially shows hours, minutes, seconds, and a $1 / 100$-second value. This changes to hours, minutes, and seconds when the time in the lower display exceeds 10 hours.

## To measure elapsed time

Note

- You can perform
split time screen

1. Press (D) to start the stopwatch
2. Press (D) again to stop the stopwatch

- You can resume the measurement operation by pressing (D).

3. Press (B) to clear the stopwatch to all zeros.

To measure elapsed time with lap times

1. When the stopwatch display shows all zeros, press
(B) to display the lap time screen (indicated by LAP/
. Press (b) to both

- At the time, both the upper and lower displays will

[^0]To measure elapsed time with split times

## Lap time

1. When the stopwatch display shows all zeros, press (B)
to display to spit time screen (indicated by SPL/ - )
2. Press (D) to start an elapsed time measurement.

- At the time, both the upper and lower displays will show identical times.

3. Press (B) to record the time of the first split. - The current split time appears in the lower display for about eight seconds, as the total elapsed time, next lap time, and next split time continue to be timed internally by the watch. The split number of the displayed time appears in the upper display. - After eight seconds, the ongoing lap time measurement appears ineasurper display and the ongoing elapsed time measurement appears in the lower display
4. Repeat step 3 to record more split times.
5. Press (D) to stop the stopwatch.
6. Press (B) to clear the stopwatch to all zeros.

## Memory Managemen

A new log is created each time you press (D) in the Stopwatch Mode to start a new elapsed time measurement operation. A log contains a log title screen, and records of all the lap or split times you record during the current elapsed time measurement operation

- The capacity of the watch's memory is 60 records.
- If you are adding records to the only log in memory and watch memory becomes full, adding another record causes the oldest record in the log to be deleted
- If you are adding records to a log when there are multiple logs in memory and watch memory becomes full, adding another record causes the oldest log in memory and all of its records to be deleted automatically to make room for new records.
- Split numbers are incremented automatically starting from 1 whenever you press (B) in step 3 of the above procedure. The maximum split number is 99 . Recording a split time after that causes the split number count to restart from 00.

To time first and second place finishes

1. When the stopwatch display shows all zeros, press (B) to display the split time screen (indicated by SPL/-)
2. Press (D) to start a time measurement.

- This freezes the time of the first finisher in the lower part of the display for abou
eight seconds. After that, the display returns to elapsed time measurement.

4. Press (D) when the second finisher crosses the finish line.

- The second finisher's time will appear in the lower display
- The difference between the first finisher's and the second finisher's time will appear in the upper display

5. Press (B) to clear the stopwatch to all zeros.

How stopwatch data is stored
The following table shows how stopwatch data is stored when you perform stopwatch button operations.

| Stopwatch Button <br> Operation | Data Storage Description |
| :--- | :--- |
| From all-zeros, press <br> (D) to start. | Creates a new log. Stores the date the button was <br> pressed, and the new log number. |
| Press B to display <br> lap/split time. | Creates a new record with each button operation. Stores <br> the lap and split times and total elapsed time at each point <br> the button is pressed. |
| Press (D) to stop <br> elapsed time <br> measurement and then <br> press B to reset. | Resets the elapsed time to all zeros without recording |

See "Recall Mode" (page E-21) for details on how to recall time records from memory

## Recall Mode

To recall stopwatch time record

1. In the Stopwatch Mode, check to make sure that the displays reset to all zeros (page E-15)
2. Use the (A) button to select either the lap time screen (to view lap time records) or the split time screen (to view split time records) (pages E-15 and E-17). - To convert a lap time saved in the Stopwatch Mode to a split time, select the split time screen.
3. Press the (C) button to enter the Recall Mode
4. Use the (A) button to scroll through the log title screens from the newest to the
oldest until the title screen of the log whose records you want to view is displayed
. Press (D) to scroll through the records contained in the log you selected in step 4 from the oldest to the newest.
Log number Lap time

- Whether you will be able to view lap time records or split time records will depend on the screen you selected in step 2, above

## To delete a log

1. In the Recall Mode, display the title screen of the log you want to delete.
2. In the Recall Mode, display the title screen of the log you want
3. Hold down (B) and (D) until
ir stops flashing on the display.

- This deletes the log and all the records inside it.
- Deleting a single log slides all newer logs (ones with higher log numbers) upwards to fill the empty space. This cause the log numbers of all the newer logs to be reduced by 1 . If there are six logs currently in memory (numbered 01 through 06) and you delete $\log 03$, the numbers of logs that previously were numbered 04,05 , and 06 will change to 03,04 , and 05 .

## Countdown Timer

To use the countdown timer
Press (D) while in the Countdown Timer Mode to start the countdown timer

- When the end of the countdown is reached and auto-repeat is turned off, the alarm sounds for 10 seconds or until you stop it by pressing any button. The countdown sounds for 10 seconds or until you stop it by pressing any button. The countdown
- When auto-repeat is turned on, the countdown will restart automatically without
pausing when it reaches zero. The alarm sounds when the countdown reaches zero
- The countdown timer measurement operation continues even if you exit the

Countdown Timer Mode

- Press (D) while a countdown operation is in progress to pause it. Press (D) again to
resume the countdown.
- To stop a countdown operation completely, first pause it (by pressing (D), and then press (B). This returns the countdown time to its starting value.

To configure countdown start time and auto-repeat settings

3. Perform the following operations, depending on which setting currently is selected on the display.
While the start time setting is flashing, use (D) $(+)$ and (B) $(-)$ to change it
Whit th to specify 24 hours
While the auto-repeat on/off setting (Ef or IF) is flashing on the display, press (D) to toggle auto-repeat on (EFF) and off ( $\mathbf{A F}$ )

- The auto-repeat on indicator ( $\leftarrow$ ) is displayed on the Countdown Timer Mode screen while this function is turned on.
- Frequent use of auto-repeat and the alarm can run down battery power.

## Alarms

You can set up to three independent multi-function alarms with hour, minutes, month, and day. When an alarm is urned on, the alarm tone sounds when the alarm time is reached. One of the alarms can be configured as a snooze alarm or a one-time alarm, while the other two ar one-time alarms. You also can turn on an Houry hour on the hour. the watch to beep twice every hour on the hour. -There are three alarm screens numbered The hourly time signal screen is indicated by : The hourly time signal screen is indicated by : 4 .
All of the operations in this section are performed in the All or the operations in this section are performed in the
Ale which you enter by pressing (C) (page E-7).

## Operation Guide 3408

Alarm Types
The alarm type is determined by the settings you make, as described below.

## - Daily alarm

Set the hour and minutes for the alarm time. This type of setting causes the alarm to sound everyday at the time you set.

## - Date alarm

Set the month, day, hour and minutes for the alarm time. This type of setting causes the alarm to sound at the specific time, on the specific date you set.

- 1-Month alarm

Set the month, hour and minutes for the alarm time. This type of setting causes the alarm to sound everyday at time you set, only during the month you set.

- Monthly alarm

Set the day, hour and minutes for the alarm time. This type of setting causes the alarm to sound every month at the time you set, on the day you set.

## To set an alarm time

. In the Alarm Mode, use (D) to scroll through the alarm screens until the one whose time you want to set is displayed.

- You can configure Alarm ; as a snooze alarm or a one-time alarm. Alarms $\boldsymbol{?}$ and Z can be used as one-time alarms only.
- The snooze alarm repeats every five minutes

2. After you select an alarm, hold down (A) until the hour setting of the alarm time

- This operation turns on the alarm automatically.

3. Press (C) to move the flashing in the sequence shown below to select other settings.

While a setting is flashing, use (D) $(+)$ and (B) $(-)$ to change it.

- To set an alarm that does not include a month (daily alarm, monthly alarm), set -
for the month. Use (D) and (B) until the - mark appears (between 12 and 1) while
month setting is flashing
To set an alarm that does not include a day (daily alarm, 1-month alarm), set -for the day. Use (D) and (B) until the -- mark appears (between the end of the month and 1) while the day setting is flashing.
- When setting the alarm time using the 12 -hour format, take care to set the time correctly as a.m. (A indicator) or p.m. (P indicator).

5. Press (A) to exit the setting screen.

Note

- Pressing any button stops the alarm tone operation
- Performing any one of the following operations during a 5 -minute interval between
snooze alarms cancels the current snooze alarm operation
Displaying the Timekeeping Mode setting screen (page E-8)
Displaying the Alarm ; setting screen (page E-31)

## To test the alarm

In the Alarm Mode, hold down (D) to sound the alarm

## Alarm Operation

The alarm sounds at the preset time for about 10 seconds. In the case of the snooze alarm, the alarm operation is performed a total of seven times, every five minutes, unti you turn the alarm off or change it to a one-time alarm (page E-34).

- Alarm and Hourly Time Signal operations are performed in accordance with the Timekeeping Mode time

To select the operation of Alarm :

1. In the Alarm Mode, use (D) to select Alarm
2. Press (A) to cycle through the available settings in the sequence shown below.

- The applicable alarm on indicator is displayed in all modes when an alarm is turned on.
- The snooze indicator flashes while the snooze alarm is sounding and during the 5 minute intervals between alarms.
- Displaying the Alarm ; setting screen (page E-31) while the snooze alarm is turned on turns off the snooze alarm automatically (making Alarm ; a one-time alarm).

E-34

## To turn Alarms 3 and 7 on and off

Alarm on indicator 1. In the Alarm Mode, use (D) to select a one-time alarm

(alarm number $\mathbf{2}$ or 3 )
2. Press (A) to toggle the displayed alarm on and oft. - Turning on a one-time alarm (2) or $\mathbf{3}$ ) displays the alarm on indicator on its screen
arm on indicator is shown on the display in all modes.

To turn the hourly time signal on and off
Hourly time signal on

indicator | 1. In the Alarm Mode, use (D) to select the Hourly Time |
| :--- |
| Signal. |
| 2. Press (A) to toggle the displayed item on and off. |
| (Aurning on the Hourly Time Signal displays the hourly |
| time signal on indicator on its screen. |
| The hourly time signal on indicator is displayed in all |
| modes. |

4. When the setting you want to change is flashing, use (B) and (D) to change it as described below.

| Screen: | To do this: | Do this: |
| :---: | :---: | :---: |
| Iff | Toggle between Daylight Saving Time ( $\mathbf{6} \boldsymbol{f}$ ) and Standard Time ( EF ) | Press (D). |
| $\text { 6 } 6.78$ | Change the hour or minutes | Use (D) (+) and (B) (-). |

5. Press (A) to exit the setting screen

- The DST indicator on the Dual Time Mode screen indicates that DST is turned on for the Dual Time Mode time.

An LED (light-emitting diode) illuminates the face of the watch for easy reading in the dark. The watch's auto light the watch towards your face. - The auto light switch must
the auto light switch on indicator) for it to operate. - See "lllumination Precautions" (page E-45) for other important information about using illumination.

## To illuminate the display manually

In any mode, press (L) to turn on illumination.

- The above operation turns on illumination regardless of the current auto light switch setting.
- You can use the procedure below to select either 1.5 seconds or 3 seconds as the illumination duration. When you press (L), illumination will remain on for about 1.5 seconds or 3 seconds, depending on the current

To specify the illumination duration

1. In the Timekeeping Mode, hold down (A) until the seconds start to flash, which indicates the setting seconds
screen.
While the seconds are lashing, press Wheting seconds are flashing, press (B) to toggle the setting between 1.5 seconds ( - ) and

About the Auto Light Switch
Turning on the auto light switch causes illumination to turn on, whenever you position your wrist as described below in any mode.

Moving the watch to a position that is parallel to the ground and then tilting it towards you more than 40 degrees causes illumination to turn on.

- Wear the watch on the outside of your wrist.

Warning!

- Always make sure you are in a safe place whenever you are reading the display of the watch using the auto light switch. Be especially careful when unning or engaged in any other activity that can result in accident or injury. Also take care that sudden illumination by the auto light switch does no startle or distract others around you.
- When you are wearing the watch, make sure that its auto light switch is turned le or any other motor distraction, which can result in a traffic accident and serious personal injury.
To turn the auto light switch on and off
To turn the auto light switch on and off
In the Timekeeping Mode, hold down (B) for abo
indicator not displayed)
- The auto light switch on indicator remains in all modes while the auto light switch is turned on.
- In order to protect against running down the battery, the auto light switch will turn off
automatically approximately six hours after you turn it on. Repeat the above
procedure to turn the auto light switch back on if you want.

## Reference

This section contains more detailed and technical information about watch operation. It also contains important precautions and notes about the various features and functions of this watch.

## Auto Return Feature

- If you leave a screen with flashing digits on the display for two or three minutes
without performing any operation, the watch saves any settings you have made up to that point and exits the setting screen automatically
The watch will change to the Timekeeping Mode automatically if you do not perform any operation in the Recall Mode or Alarm Mode for two or three minutes.

## To turn the button operation tone on and of

In any mode (except when a setting screen is on the display), hold down © to toggle the button operation tone on (mute indicator not displayed) and off (mute indicator displayed).

- Holding down (C) to turn the button operation tone on or off also causes the watch's - The mute indicator is
urned oft turned off.

Button Operation Tone

The button operation tone sounds any time you press one of the watch's buttons. You can turn the button operation tone on or off as desired

- The multi-function alarms and Countdown Timer Mode alarm will sound even if the button operation tone is turned off.

## Scrolling

The (B) and (D) buttons are used in various modes and setting screens to scroll
through data on the display. In most cases, holding down these buttons during a scrol operation scrolls through the data at high speed.

## Timekeeping

- Resetting the seconds to 6 while the current count is in the range of 30 to 59 causes the minutes to be increased by 1 . In the range of 00 to 29 , the seconds are reset to $\mathbf{E I}$ without changing the minutes.
- The year can be set in the range of 2000 to 2099 . lengths and leap years. Once you set the date, there should be no reason to change it except after you have the watch's batteries replaced.

## Illumination Precautions

- Illumination may be difficult to see when viewed under direct sunlight.
- llumination turns off automatically whenever an alarm sounds.
- Frequent use of illumination runs down the battery.

Auto light switch precautions

- Avoid wearing the watch on the inside of your wrist. Doing so causes the auto light switch to operate when it is not needed, which shortens battery life. If you want to wear the watch on the inside of your wrist, turn off the auto light switch feature.

More than 15 degrees too high

Illumination may not turn on if the face of the watch is more than 15 degrees above or below parallel. Make sure that the back of your hand is parallel to the ground

- Illumination turns off in about 1.5 seconds or 3 seconds, even if you keep the watch pointed towards your face.
- Static electricity or magnetic force can interfere with proper operation of the auto light switch. If illumination does not turn on, try moving the watch back to the starting ard youn. If this does back up again.
- Under certain conditions, illumination may not turn on until about one second after you turn the face of the watch towards you. This does not necessarily indicate malfunction of the auto light switch
- You may notice a very faint clicking sound coming from the watch when it is shaken back and forth. This sound is caused by mechanical operation of the auto light switch, and does not indicate a problem with the watch.

## Specifications

Accuracy at normal temperature: $\pm 30$ seconds a month
Timekeeping: Hour, minutes, seconds, a.m. (A)/ p.m. (P), month, day, day of the week Time format: 12-hour and 24 -hour
Calendar system: Full Auto-calendar pre-programmed from the year 2000 to 2099

## Stopwatch

Measurement Capacity: 99 hours, 59 minutes, 59 seconds
Measurement Unit: $1 / 100$ second (from 0 to 59 minutes, 59.99 seconds) or 1 second (from 1 hour to 99 hours, 59 minutes, 59 seconds)
Measurement Types: Elapsed time, lap times, spit times, two finish
Memory Capacity: 60 reco
Other: Lap/split numbers
Countdown Timer:
Measuring unit: one second
Input range: one minute to 24 hours (1-minute increments and 1-hour
increments)
Other: Auto-repeat timing

[^1]
[^0]:    3. Press (B) to record the time of the first lap.
[^1]:    Alarms: 3 Multi-function*alarms (Two one-time alarms; one snooze/one-time alarm); Hourly Time Signal
