# Only the best ...

[www.euroncap.com](http://www.euroncap.com)

**80% of all cars rated in 2011 have tested with at least one of our seats\***

Each year, new exciting cars are launched and you're going to put our car seats in these cars. Our partnership with Euro NCAP ensures that our seats are tested in the cars you actually drive, and become part of the safety rating of those cars. These leading manufacturers have used at least one BRITAX RÖMER car seat at Euro NCAP since child safety assessment was introduced in 2003:

Alfa Romeo	Lexus
Audi	Mazda
Chevrolet	Mercedes-Benz
Chrysler	Mitsubishi
Citroën	Nissan
Dacia	Opel
Daihatsu	Peugeot
Dodge	Renault
Fiat	Saab
Ford	Seat
Honda	Škoda
Hyundai	Smart
Jaguar	Subaru
Jeep	Suzuki
Kia	Toyota
Lancia	Volvo
Land Rover	VW

Euro NCAP provides independent crash test assessments of new vehicles sold in Europe  
\*2011 Test Results  
[www.euroncap.com](http://www.euroncap.com)

**When you're looking for a child safety product, you're looking for something that can take care of your child as well as you do. That's at the very core of BRITAX RÖMER. We make products which you can trust and which you can be proud of because only the best is good enough for your child.**

With roots in safety going back to the 1930s, BRITAX RÖMER brings unparalleled experience in what is needed to take your child safely on the road. Having been at the forefront of building the standards that are used in today's adult seat belts and the harnesses used in racing cars, we have carried on leading by pushing the industry to always go further. We're proud of our heritage, just as we're excited about our future and about the research we're continuously doing to improve child safety and to make products which work better and, through clever design, fit better into your life.

## **What's so different about BRITAX RÖMER?**

**We don't cut corners. That means that when we make a product, we make it knowing we'll test it far beyond the legal requirements and that we'll make sure it's easy to use and stylish to boot.**

We'll never make a compromise to your child's safety to make a product cheaper and we'll build it to withstand the toughest of situations. We'll test it in our advanced testing facilities in labs, in real cars and even in aircraft (yes, we go so far as to simulate aircraft crashes when testing products that will be used on planes!). The same research and development that resulted in the BRITAX RÖMER led ISOFIX standard is still on-going, building the safety standards of the future. The same skills and know-how that led to the super-safe racing harnesses in sports cars is leading to harnesses in child seats which will embrace your child in their protective environment in the most extreme situations. That's what's so different about us – going beyond the requirements to look after your child just as you would yourself.

We also care about the environment, manufacturing to sound ecological principles. In Germany we're certified to the DIN EN ISO 14001 standard based on the environmental auditing law.

# Energy Management explained

Most vehicle restraint and safety systems are designed with adults in mind. But in an accident energy forces can reach more than a ton. You know as well as we do that children are far more fragile than adults. We make child seats designed to protect the most precious cargo you'll ever carry.

**Our advanced safety technologies form part of what we call 360° Protection – our commitment to keeping your child safe from every possible angle of impact.**

## Why a 5-point harness?

When a Formula 1 driver sits down in his car, what does he put on?

**A 5-point harness.** It's only through this restraint system covering all the key body parts that a driver in a 350km/h race car feels safe enough to race and it's only through the same technology that your child is safe enough in the many different environments which you can face on the road. This is why you'll never see any other restraint system on a BRITAX RÖMER infant or toddler seat and why we're helping you extend this ultimate protection into Group 2 seats. And this is why you can feel completely sure that putting your child in a BRITAX RÖMER seat is the best way of ensuring their safety.

## What is ?

We developed **ISOFIX** back in 1997 in conjunction with VW. It's now an international installation standard for car seats in vehicles. Because ISOFIX connects car seats rigidly to the vehicle chassis rather than just using the adult seat belts, it reduces installation errors and increases child safety enormously.

## What is ?

Our unique **ISOFIT** system is specially designed for group 2-3 car seats (for children weighing 15-36kg). It uses the ISOFIX installation system as well as the vehicle's seat belt, directing impact forces around the seat, improving protection in side impact collisions and preventing sideways movement.

### Does my car have ISOFIX?

Look for this symbol – it'll tell you where the ISOFIX anchorage points are in your car.

Please refer to your vehicle's handbook to ensure compatibility

### Did you know...

Only 30% of child car seats are installed correctly when using an adult seat belt, 96% when using the ISOFIX system (Reference: The German Insurance Institute GDV, Group 1 car seats)

## What is ?

Not every ISOFIX is the same: our latest safety improvement **ISOFIX+** seats use the ISOFIX installation system, with wider ISOFIX connectors, which limits sideways movement and lower forces. It is also with the addition of the **V-Tether**, a top tether which adds a third anchorage point, reinforcing the seat's stability. In the event of an accident, our intelligent V-Tether technology absorbs impact forces proportionate to those generated by the collision, dramatically reducing any forward or rotational movement in a crash situation. Even more protection for your child.

 **V-TETHER**

## BRITAX-RÖMER ISOFIX with Pivot Link

We're always looking for new ways to improve safety. In front and rear collisions our patented **Pivot Link system** stops your child being jolted so far forward – not only reducing the amount of force your child is subjected to, but reducing the odds of their head hitting the car interior.

## What is **D-SIP**® ?

We developed the **D-SIP**® to provide even better protection for babies in side-on collisions. It's a D-shaped device built into the sides of our **BABY-SAFE** plus II infant carriers. The D-SIP nearest the car door is then manually turned outwards and locked in place. Because this brings the point of impact closer, it reduces momentum first, and then disperses the energy through the entire carrier shell – away from your baby.

KID SICT Range

Typical highback booster seat

## What is **SICT** ?

We developed **Side Impact Cushion Technology (SICT)** to increase child safety in side-on collisions. The air-filled energy management cushions compress to absorb crash forces, expelling the air through vents. Not only do they reduce side impact crash energy by over 25%\* for the child in the seat, protecting head, neck and torso, they're a soft point of impact for other back-seat passengers. What's more, they don't need any maintenance.

\*Reference:  
Internal BRITAX  
testing 2010

## What is an **SI-PAD** ?

Our uniquely-designed **SI-Pads** are made of energy-absorbing material and built into the critical areas of the seat's side panels.

The optimised position and material choice act as a superior impact-absorbing barrier to protect your child from side collisions.

## How to choose the right CAR SEAT

### 1. Weigh your child & check their height

Car seats are grouped by a child's weight and height. Of course age is an indicator, but for maximum safety you need to know how much your child weighs and how tall they are, to choose the right seat.

### 2. Check your car

**Most new cars and all cars made from 2011** with ISOFIX and Top Tether

**Newer, modern cars** with ISOFIX

**Older cars** with vehicle seat belt

### 3. Identify your needs

Some of our child seats have different features, so take a moment to think about which features are going to be most important for your day-to-day use.

#### THINGS TO CONSIDER

##### Single group vs. Multi-group seats

Single group seats are designed specifically for a smaller weight range and, as a result, offers the best possible fit for your child at that age and height range. Multi-group seats are adjustable and grow with your child. They are ideal for those regularly driving children of different ages or if you would prefer to simply buy one seat to last through all the ages.

##### What does the law say

Child seats are compulsory for children up to 1.35m or 1.5m tall – depending on where you're travelling in the EU. Child restraint systems with the ECE R44/04 certification label comply with this law. It's illegal to use a rear-facing seat in the front of the car if the car has an active airbag.

Use our online Fit-Finder to search for your perfect car seat  
[www.britax-roemer.eu](http://www.britax-roemer.eu)

# How to choose the right TRAVEL SYSTEM

## 1. Identify your child's needs

If your child's happy, you're happy. So as well as buying the right pushchair for your child's age, consider features like rear-facing seat units so your baby can see you, or a carrycot which fits smoothly onto a pushchair chassis so you don't disturb their sleep.

## 2. Identify your needs

Small car boot or very little storage at home? Choose a pushchair which folds up small. Consider a tandem travel system when you've got two children, and with older children a lightweight pushchair makes long walks less tiring.

## 3. Think about your lifestyle

If you walk a lot, lockable/swivel and larger wheels make lighter work on heavy terrain. On public transport, size and weight are important. If you use a car, consider a travel system with detachable infant carrier. How about accessories such as raincovers and cosytoes to keep your child warm and dry?

## THINGS TO CONSIDER

### CLICK & GO® system

With CLICK & GO®, you can fit your infant carrier or carrycot directly onto the pushchair chassis – hassle-free travel.

### Rearward and forward facing seat

Younger babies need eye contact with their parents, but with a reversible seat unit you can let them look at the world ahead when they're older.

### Handles

All of our pushchairs feature a soft-grip handle, but look out for height-adjustable handles for a perfect fit.

### Folding

Folding any pushchair should be intuitive and easy but, above all, quick. Look out for our new easy one-handed pull fold mechanism.

### Reclining options

Adjusting your child's position to allow sleep or stimulation ensures they're comfortable and happy. But babies should lie flat for the first few months of their lives to help the spine and respiratory system develop healthily.

### Wheels

Front wheels can be locked or allowed to swivel; swivelling makes cornering easier, while locked wheels provide stability on uneven ground. Larger wheels work better on sand, mud or snow, but smaller wheels allow for a smaller folded pushchair size. And with quick-release wheels you'll find storage in the home or car even easier.

SPECIAL  
2013

# GO ON SAFARI!

WITH **Britax**

Römer

Sitting in a car seat or pushchair should be fun as well as safe. This year, BRITAX RÖMER takes your child on a safari to deepest Africa! The most striking creatures of the savannah can now be your child's companion with our Smart Zebra and Big Giraffe fashions. Give your child a car seat which will put a smile on your face as well as theirs!

# EXCLUSIVE COVERS by bellybutton

bellybutton stands for love, trust and the know-how gathered by experienced mothers. All bellybutton products are designed to offer only the very best to mothers and their children: trendy fashion, nourishing skin care and gifts which come straight from the heart. The "bellybutton by RÖMER" edition combines the highest safety standards with the unique bellybutton design, for your children to travel safely and in style right from the very first day of their lives. The "bellybutton by RÖMER" covers are removable and machine washable.

For more information visit [www.bellybutton.com](http://www.bellybutton.com)

## A word from the bellybutton partners

"Being mothers ourselves, we know how important safety is for our children and are therefore delighted to work with RÖMER – the leaders in children's car seats and safety.

The bellybutton designs we created for RÖMER are part of the unique world of bellybutton where each product is designed with love and our experience as mothers. Have a safe journey and enjoy!"

Ursula Karven, Astrid Schulte, Annette Bode, Dana Schweiger and Katja Emcke (from left to right)

Yours,

## BABY-SAFE Sleeper

The **BABY-SAFE Sleeper** is a complete lay-flat safety system which can be used in the car or with any of our pushchairs. Its energy-absorbing interior is designed to offer the newborn baby 360° body protection and comfort. With the handle in the upright position, the roll cage feature provides a protective zone around the baby in the event of an accident.

### BABY-SAFE plus infant carriers

Our **BABY-SAFE plus II** infant carriers are the ideal first car seats from birth offering superior side impact protection with our innovative D-SIP® technology. The integral recline system allows for a flatter position for your baby to lie, while the integrated adaptors allow you to attach the infant carrier quickly onto any of our pushchairs to form a travel system.

The **BABY-SAFE plus SHR II** has all the safety features of the **BABY-SAFE plus II**. In addition the single-handed release mechanism offers easy release from the pushchair using just one hand and the soft-touch area on the handle allows for comfortable carrying.

BABY-SAFE plus SHR II:

**Height-adjustable headrest and harness** with easy single-handed adjustment, prevents rethread errors

**Single-handed release mechanism** for easy release from pushchairs (BABY-SAFE plus SHR II)

**Soft-touch area on the handle** for comfortable carrying

**Deep, softly-padded side wings** for your baby's safety and comfort

**D-SIP® technology** provides superior Side Impact Protection (See page 7 for full explanation)

**5-point safety harness** with one pull adjustment

**Integral recline system** for a flatter lying position

### BABY-SAFE ISOFIX and Belted Bases

These provide click on-and-off convenience for fitting infant carriers in cars. The integral foot props mean greater stability and an even safer ride for your child.

See the vehicle application list on our website to check if these bases are approved for your car.

**ISOFIX system** allows direct connection to the car's ISOFIX anchorage points

TRAVEL  
SYSTEMS

BRITAX  
B-DUAL

The **B-DUAL** is a flexible pushchair that, with the addition of a second seat, transforms into an in-line tandem travel system for two children, from birth to toddler. The main seat unit can be used rearward or forward facing and both seats have a lay-flat position for newborns. The B-DUAL can be used for children of different ages or for twins, because a seat unit or an infant carrier can be fitted in either the front or rear position.

# BABY CARRIER

### Made for baby

Wearing our **BABY CARRIER** creates more quality time with your child when you're out and about. Carry your baby inward facing to instill a sense of security while reinforcing that all-important bonding; or outward facing to feed your child's curiosity about the world around them. The adjustable head support and padded leg openings ensure the highest level of comfort.

### Designed for you

We developed our CarryLong weight distribution system with the weary parent in mind. Its padded waist belt and shoulder straps distribute your child's weight evenly across your shoulders, back and hips, ensuring maximum, long-wearing comfort, increased stamina, and reducing the odds of aches and pains. The simple design allows you to easily take the carrier on and off unaided.

### Fabric Options:

# DUO plus

The **DUO plus** is all about flexibility. Because it can be installed using either the ISOFIX system or a 3-point seat belt it can be easily moved to a different position in the car, or transferred between cars. With several recline positions and an adjustable headrest and harness the seat provides comfort for your child. Deep, softly padded side wings provide optimum side impact protection, while the pivot link system reduces forward motion in the event of an accident.

# KING plus

The **KING plus** has an automatic seat belt tensioning system and a seating area that tilts forward – making for quick, easy and, above all, safe installation using your car’s 3-point seat belt, perfect for families with more than one car. The deep, softly padded side wings protect from side impacts, while the headrest provides extra comfort and support. You can easily recline the seat without disturbing your child, and the headrest and harness are simple to adjust to your child’s height.

# ECLIPSE

With its slim base, the **ECLIPSE** is the ideal solution for three-door or small cars and can be installed with either a 3-point seat belt or a 2-point lap belt. You can easily recline the seat for your child's comfort without disturbing them. The softly padded side wings protect from side impacts, while the pitch control system reduces the child's forward movement in the event of an accident.

# XTENSAFIX

NEW

**Uniquely grows as your child grows, with harnessing up to 25kg. XTENSAFIX** is suitable from nine months to the moment a child's ready to use the car's own seat. That means there's no need to constantly upgrade. What's more it uniquely offers the safety and comfort of the harness for up to 25kg, longer than other seats, which helps avoid moving a child too early. This gives informed parents the choice of when their child is ready for the next stage. It includes all the safety features you'd expect from BRITAX RÖMER, like ISOFIX+ and Pivot Link. You can be certain your child will be safe, no matter of their age or size.

## Fabric Options:

Black Thunder

Chilli Pepper

Dark Grape

Crown Blue

Smart Zebra

▶ **EXTENDED HARNESSING UP TO 25KG**

**Height-adjustable headrest and harness** with easy single-handed adjustment, prevents rethread errors

**Performance chest pads** reduce your child's forward movement in the event of an impact

**Quick-remove cover** without interfering with the harness

**5-point safety harness** with one-pull adjustment

**Deep, softly padded side wings** provide optimum Side Impact Protection

**Harnessing up to 25kg**

**Multiple recline positions** – adjusts without disturbing your child

**V-Tether** provides a third anchorage point, limiting the rotational movement of the seat

**ISOFIX+ system** – superior ISOFIX system allows direct connection to the car's ISOFIX and V-Tether anchorage points

# KIDFIX SICT and KIDFIX

KIDFIX SICT

KIDFIX

Fabric Options:

\* only available for KIDFIX

**FULL BODY PROTECTION**

**KIDFIX SICT**

The **KIDFIX SICT** is our top of the range Group 2-3 seat. Our Side Impact Cushion Technology (SICT) offers superior protection in the event of a side-on collision. The ISOFIT system locks the seat to the car's chassis through the ISOFIX connection points. Your child is secured using your car's 3-point seat belt, which is perfectly positioned over your child's shoulder and pelvis via the built-in seat belt guides.

Height-adjustable headrest

**Side Impact Cushion Technology** provides superior Side Impact Protection

**ISOFIT system** allows direct connection to the car's ISOFIX anchorage points

**VIDEO**

**V-shaped backrest** – ensures a perfect fit throughout your child's development

**Softly padded cover** can be removed for washing

**KIDFIX**

The **KIDFIX** offers outstanding comfort and safety in cars where the added width of the SICT cushions is unsuitable. With multi-recline and 11-position height-adjustable headrest it's flexible enough to meet the needs of any child in the age range.

\*Only available for KID plus

**FULL BODY PROTECTION**

**KID plus SICT**

The **KID plus SICT** incorporates our Side Impact Cushion Technology (SICT), offering superior protection in the event of a side impact. Three adjustable widths let the seat grow with your child, and the recline feature makes for a relaxing ride. The seat belt guides ensure a perfect fit over your child's shoulder and pelvis and locks the seat firmly in place.

**KID plus**

If space is at a premium the **KID plus** is full of safety and comfort features. Just like the KID plus SICT, it uses seat belt guides to ensure your car's 3-point seat belt holds your child and the seat firmly in place, and we've included optimum side impact protection in the shape of thick, softly padded wings.

**Accessories KID plus SICT and KID plus:**

# TRAVEL ACCESSORIES

We know that little details make all the difference. That's why we have developed an extensive range of travel accessories to help you on your way. There are accessories to protect your child from the cold and the heat, and there are others to make their journeys safe and comfortable. To see the full range, please visit our website.

SAFETY ESSENTIALS

### Newborn Protector

Providing additional head support for newborn and premature babies, the newborn protector for the BABY-SAFE Sleeper limits babies' movement when travelling by car.

### Top Tether and Fixing Tethers

Attaching to anchorage points in the car, these tether straps limit the car seat's rotational movement.

### Performance Pad

The DUO plus is only approved for the following vehicles if the performance pad is fitted into the seat: BMW (Mini), Mitsubishi Colt (3-door and 5-door), Smart forfour and fortwo, Suzuki Swift (EZ, MZ).

TRAVEL SYSTEM PRODUCTS

### Second Seat

Suitable from birth to 15kg, this additional seat unit turns the B-DUAL into an in-line tandem travel system, so your two children can travel together.

### Second Infant Carrier Frame

By using this metal frame, you can add a second infant carrier onto your B-DUAL.

### Carrycot

Provides a comfortable lay-flat position for your baby and attaches directly onto compatible pushchairs.

### Soft Carrycot

Complete with carry handles, this lightweight soft carrycot offers a lay-flat position and can easily be secured onto compatible pushchairs.

### Bumper Bar

Your growing child can hold onto this bumper bar and enjoy a comfortable ride.

### Travel Bag

Offers convenient storage and transportation of your B-AGILE 3 or 4 whilst travelling.

### Pushchair Organiser

Approved for use with B-AGILE, B-SMART and B-DUAL. Two insulated beverage holders keep your drinks hot or cold, whilst a large compartment and external pockets offer ample storage.

### Play Tray

This easy clip-on play tray is ideal for play and meal times. Suitable for B-AGILE 3 or 4.

### All-Terrain Wheels

Tackle tougher terrain easier with these all-terrain wheels. Suitable for the B-AGILE 4.

PROTECTION FROM  
HEAT AND SUN

**Keep Cool Covers**

The OUTLAST® technology used in the development of the Keep Cool Cover absorbs excess body heat ensuring your child stays comfortable when travelling on even the hottest days.

**Summer Covers**

This 100% cotton, light towelling cover helps keep your child comfortable on warm days.

**Sunshade (2 pack)**

Protects your child from direct sunlight while travelling in the car.

PROTECTION FROM  
RAIN AND COLD

**Cosytoes**

Keeps your baby snug and warm. Unique to BRITAX RÖMER infant carrier cosytoes, the car seat buckle is visible at all times and is fully crash tested, making it safe to use during car journeys.

**Raincovers**

Protects your baby from the wind and rain.

COMFORT AND PRACTICALITY

**Spare Covers**

You may need a spare cover when washing the original or maybe just to freshen up the look.

**Head Support**

This comfortable cushion is designed to support your child's head.

**BABY-SAFE Adaptors**

Use these adaptors to fit previous BABY-SAFE and BABY-SAFE plus II infant carriers onto compatible BRITAX pushchairs.

**Drink & Snack Holder**

Refreshments are always to hand for your child.

**Changing Bag**

This wipe-clean changing bag comes with internal and external storage pockets, a changing mat and a cool bag for bottle always to hand for your child.

**Bib (2 pack)**

100% cotton and machine washable bibs for your BABY CARRIER.

**Fitting Kit for second bike**

Allows easy transfer of your JOCKEY bike seat between bicycles.

**Seat Extender Insert**

Provides a wider seating area for your BABY CARRIER allowing your growing child to sit in a comfortable, natural position when facing inward.

**Car Seat Protector**

Fully crash tested, this durable seat protector helps prevent slipping and protects upholstery from spills and depression damage. Includes a handy front storage pocket.

**Seat Organiser**

Provides storage for toys, drinks and snacks and protects your car interior from dirty feet – simply attaches to the back of the driver or passenger seat.

# JOCKEY Comfort and JOCKEY Relax

**JOCKEY  
Comfort**

**JOCKEY  
Relax**

## Fabric Options:

## Fabric Options:

### JOCKEY Comfort

When it comes to bike seats you're looking not only for safety, you should expect convenience too. The **JOCKEY Comfort** has an extra large integral spoke cover and 3-point harness system, and importantly, the buckle, backrest and 9-position headrest can all be adjusted with just one hand. With adjustable footrests and a reversible cover made from breathable fabric you'll have a happy child on board.

**Accessories:** (Available separately)  
For a full accessories overview, see page 62/63

Fitting Kit for second bike

Single-handed headrest adjustment with 9 height positions

### JOCKEY Relax

The **JOCKEY Relax** is every bit as safe as our Comfort model: its extra large integral spoke covers protect your child's feet from the wheel spokes, while the footrests adjust to your child's size. It's easy to fit, its cover is easy to remove, and you only need to use one hand to switch the backrest from upright to recline.

**Accessories:** (Available separately)  
For a full accessories overview, see page 62/63
