Understanding Life.

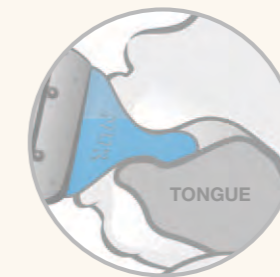

A feeling of trust evolves from assurance

For 60 years, we have dedicated ourselves to the daily search for new solutions that make life easier for parents and help children in their development. During this process we have put our trust in experts of many disciplines: midwives, doctors, nutritionists and of course parents.

It all began with our masterpiece: the first orthodontic soother.

The two dental experts Prof Dr Dr W. Balters and Dr med. dent. A. Müller laid the foundations for NUK with the invention of the first orthodontic soother as far back as 1956. Since then, the unique NUK Range of Soothers started its success story. The original soother from NUK reduces the risk of tooth misalignment. The special shape of the NUK Teat simulates a mother's nipple during breastfeeding. Apart from that, all NUK Soothers and Teats have the NUK Air System.

For generations now NUK Products have enjoyed immense popularity the world over. One important reason for this is the special orthodontic shape of NUK Teats and Soothers.

All NUK Teats and Soothers have a special vent system:

With teats the NUK Anti-Colic Air System reduces the discomfort caused by swallowing of air and infant colic – for contented babies. With soothers the NUK Air System vent enables air to escape from the baglet, thus ensuring that the soother is particularly soft and pliable.

The orthodontic shape of NUK Teats and Soothers is based on medical knowledge and is proven to promote the natural and healthy development of jaw and palate.

MEDICPRO

Germany: reddot design award 2013 – NUK Ready-to-use First Choice Range and 45ml bottle

NUK grows with the child - systematically

Children are the greatest source of happiness on earth. To protect them and to advance their development, is what we, at NUK, understand to be our mission - no matter how great the effort.

The well thought-out solutions, which this approach systematically leads to, can be seen today in our complete range. All NUK Products are based on a modular design and ideally suit the different development stages of a child – from birth right through to pre-school.

Mothers in more than 110 countries trust the unique knowledge and experience of the NUK Brand.

Great beginnings

Right from the start NUK offers the best

Children's oral development is important for their overall health. So, together with dental experts, NUK developed the NUK 4-Phase Oral Care System – high-quality products that aid healthy oral development. From soothers to toothbrushes, these products are appropriately designed specifically to meet the standards of midwives, doctors, parents and, of course, children around the world.

Expect a lot from soothers
with a background of
60 years of experience

Extra-flat baglet

Thanks to the smoother and extra-flat baglet, the tongue has plenty space for natural sucking movements. That makes the new NUK Genius even kinder to teeth.

Especially soft on the top

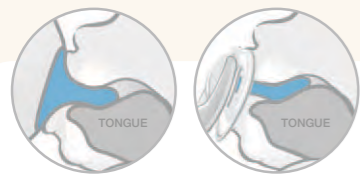

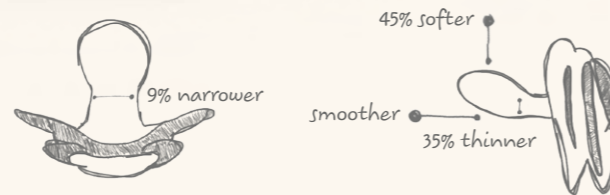

Its particularly soft surface moulds itself gently against your child's palate.

Naturally shaped like a mother's nipple

NUK Soothers resemble the shape of a mother's nipple as she breastfeeds and quite naturally satisfy your baby's innate need to suck.

Particularly thin teat neck

The even narrower and thinner teat neck helps reduce pressure on the little jaw and teeth.

The orthodontic NUK Shape

All NUK Soothers have the original NUK Shape for a healthy development of the jaw. Developed by dental practitioners to simulate Mother Nature's own example.

The NUK Air System

All NUK Soothers come with the NUK Air System. Air can escape through the baglet vent, thus allowing it to stay soft and keep its shape and thereby helping to prevent jaw malformation.

Size Concept

This system offers the right size soother for each age.

The different soother sizes should always be subject to each baby's individual development.

Size 0: special size for small newborns from 0-2months

Genius Latex Soother

- Assorted colours

Taking our example from nature

It has been proven: breast is best. But when breastfeeding is not possible, babies do not need to miss out on this precious nutrition. Along with breast pumps and other breastfeeding aids, NUK offers practical products to help with the everyday routine: the NUK Bottle Feeding Range. Included here are NUK First Choice+ Teats, with the NUK Shape, which is modelled on a mother's nipple as she breastfeeds, for a more natural feeling while drinking.

Efficient, comfortable and easy to handle:

NUK Luna Breast Pump

SOFTER

Super-soft silicone cushion, textured for a pleasant massaging sensation and for the perfect moulding to the breast.

GENTLER

Suction strength is fully adjustable - for particularly gentle expressing and maximum well-being.

MORE EFFICIENT

The 2-phase rhythm simulates a baby's natural suction rhythm when breastfeeding.

With NUK Breast Milk Container

Can be mains or battery operated

As long as it's breast milk

Even if there is a time when mothers cannot breastfeed, the baby does not have to go without precious breast milk. With NUK Breast Pumps, mothers can quite simply express the milk and bottle feed as required – whether at

home or out and about. Also all other NUK Breastfeeding Aids offer mothers the chance to solve most breastfeeding problems quickly.

Luna Electric Breast Pump

- High expressing action due to the 2-phase rhythm
- Phases can be selected individually
- Suction strength is fully adjustable - for particularly gentle expressing
- Super-soft silicone cushion, textured for a pleasant massaging sensation and for perfect moulding to the breast
- Can be operated with just one hand and is easy to clean (few parts)
- Can be mains or battery-operated. Has a (global) adapter for use when travelling
- Compatible with all NUK First Choice Bottles and Teats
- Includes NUK Breast Milk Container, screw ring, sealing disk, NUK First Choice+ Teat (Silicone, 0-6 months, S), protective cap, stand, mains plug and adapter plug

Relaxed drinking, just like breastfeeding: NUK First Choice⁺

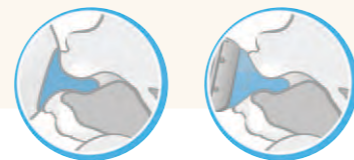

What makes NUK Teats so unique:

Natural and shaped for the jaw:
The special NUK Shape is like a mother's breast during breastfeeding

Super Soft:
With the new Soft Zone the teat even better adapts to baby's mouth

Less colic:
The new Anti-Colic Air System ensures a natural flow to help your baby drink without swallowing air

**** Clinically proven:**

The natural and orthodontic NUK Shape is like a mother's breast during breastfeeding and particularly suitable if you both breast and bottle feed your baby.

For an optimal combination of breast and bottle feeding. Moral et al. BMC Pediatrics 2010, 10:6. Further information at <http://www.nuk.com/research>

NUK Anti-Colic Air System

NUK Anti-Colic Air System minimises infant colic caused by harmful swallowing of air.

Size concept

The NUK Teat grows with the child, so it's neither too big nor too small. Just right, in fact.

(Latex Teats) (Silicone Teats)

Hole identifier

NUK offers different hole sizes for the child's needs.

- S** Small for thin liquids such as breast milk, tea, water
- M** Medium for milk (formula)
- L** Large for thicker feeds
- XL** Extra Large for milk with cereals

*The sale of BPA-containing infant feeding bottles on the EU market is prohibited as of 01.06.2011. NUK had already dispensed with polycarbonate bottles that contained BPA long before the demand of the EU and therefore, years before the final banning, could brand its baby products as "BPA-free"

** Moral, A. et al.: Mechanics of sucking: comparison between bottle feeding and breastfeeding. BMC Pediatrics 2010; 10:6

Learning to eat and drink is child's play

From about the sixth month on, a child is physically able to eat and drink like the big kids. So NUK has developed a programme that helps to learn how to drink and eat and that "grows" with the child: NUK Easy Learning. It is exactly right for the different types of nutrition a child needs throughout the natural phases of learning development. Thought-through products help make the changeover from liquids to solids not such a difficult step.

Extraordinary moments
call for extraordinary bottles:
NUK First Choice Cups

Active Cup Kiddy Cup Flexi Cup Junior Cup Sports Cup

12 months+

18 months+

36 months+

Children develop extremely quickly. From day to day they can do more, go a step further, say a new word or are a centimetre bigger yet again. But discovering yourself and the world so quickly can make you very thirsty. So that little ones are soon able to quench their thirst alone, there is the NUK First Choice Cup range. All NUK Cups quench

great thirsts and are extremely sturdy. And they can be combined together: the tops and cups are interchangeable. And because they should also make the daily routine easier for mothers, after a tumble into the sandpit it is quick and easy to clean and put them together again – ready for the next adventure!

Active Cup

300ml (12 months+)

Conjure up meals in minutes

Gently efficient: NUK Thermo Light+

So as not to lose any of the healthy vitamins and nutrients babies need for their development, bottles of milk or jars of food should be warmed up as gently as possible. With the NUK Thermo Light+ Baby Food Warmer, babies' meals are brought to the right temperature in a steady and consistent way so that the food keeps its nutritional value. Its unique light technology also ensures more hygiene in the home, for, unlike conventional baby food warmers, the NUK Thermo Light+ works without any water at all, making cleaning easier and giving parents more time to enjoy life.

Thermo Light+

Baby Food Warmer

- Without water: hygienic and easy to clean
- Heats evenly and gently
- For use with a variety of container sizes
- Suitable for mashed and liquid food in usual jars and bottles
- Device automatically switches to "keep warm" once heating time has expired
- Easy-clean glass dish
- Removable ring for easy cleaning
- Nominal power supply 230V, 50Hz, rated power 100W

D, GB, E, P, F, I, GR, RUS
 Art. No. 10.256.355

Practical loving care

NUK Baby Thermometer Flash – Non-contact Measurement in Seconds

Sleep is often the best remedy! That is also the case for babies and toddlers. When, even in the night, parents have to check the body temperature of their charges regularly, they want to do it in a particularly gentle and caring way – and best of all without waking their little one. With the NUK Baby Thermometer Flash this is not a problem, as measuring a temperature only takes a second without any contact.

The NUK Baby Thermometer Flash uses an infrared transmitter. It is non-contact as the measuring tip can be held up to 3 cm away from the forehead.

NUK Welcome Set

Peace of mind

The smart choice: NUK Baby Monitor Eco Smart Control 300

The NUK Baby Monitor Eco Smart Control uses the NUK LiveCam App to let parents access the baby monitor directly on their smartphone or tablet. Unlike conventional smartphone solutions for sleep monitoring, the NUK model works with innovative power line communication technology, which initially sends all the data over existing power cables. Transmitting the sound and picture via the internet in brilliant quality, both reliably and free of interference, the baby monitor produces no wireless radiation in the child's room, irrespective of range.

Smart Control Multi 310*Digital Baby Monitor (WiFi)*

- WiFi connection
- Pan and tilt camera
- 100% interference free
- Night light function
- Two-way speaking function and noise detection
- Sensor keys for manual actuation and lullaby function
- Temperature detection
- Free app for iOS and Android (Languages: D, GB, F)
- Photos and videos can be recorded via app

Toys

Little animals, great fun.

When children play, it is their very own way of discovering the world. From a very early age and with a fascinating curiosity, they busy themselves just as much with unknown objects as with their favourite toys and put all their senses to the test. This curiosity in the things around them is innate in babies and parents can help develop it in their children with well thought-through playmates right from the first weeks and months of life.

**NUK PLUSH TOYS
5 SENSES COLLECTION**

- Comfortable & cozy

Knowing everything's clean is a great feeling

With the arrival of a baby, a lot of other new things move into a home: a changing unit, baby bed, nappies etc. But new parents are often unsure when it comes to choosing the right products for washing and cleaning. A new range of household products would make sense now too: one that not only cleans hygienically, but is also safe for babies

and their soft skin. With its range of household products, NUK is bringing the solution onto the shelves: highly-effective household products that clean the laundry and floors both not only thoroughly but also in a way that is gentle and safe for babies.

Laundry Detergent

- Strong but gentle cleaning performance
- For white and coloured baby laundry (20, 30, 40, 60, 90°C)
- Washes out without residue
- Skin compatibility dermatologically tested
- Naturally based ingredients

60 ml

*Proven a million times over and reliable...
and therefore No.1 in German hospitals!*

NUK MedicPro is a product range primarily aimed to the needs of healthy newborns and is accepted as the standard range for feeding in maternity wards in more than 90% of German hospitals. NUK MedicPro also offers specialised products for infants in intensive care, such as prematures and for infants with feeding problems. The products are developed in cooperation with medical experts, always based on the latest scientific knowledge. From breast pumps

and breastfeeding aids over to sterile READY-TO-USE orthodontic teats, soothers and feeding bottles for newborn and premature babies, the NUK MedicPro Range meets the demand of mothers and babies during their stay at hospital. Special products like the NUK Therapeutic Trainer, X-Ray Soother and the special 45ml bottle for breast milk collected with syringe are completing the range.

The NUK Product Benefits at a glance:

Sterile
acc. Ph. Eur.

All disposable hospital products are sterile according to Pharmacopoea Europaea.

The sale of BPA-containing infant feeding bottles on the EU market is prohibited as of 01.06.2011.

ETO FREE
STERILISATION

Our products are sterilized without use of Ethylene oxide.

Made in Germany

Products* for use in hospital are made in Germany.
*Breast pads and glass bottles are made in EU.

MedicPro: Number 1 in German paediatric clinics – now available for pharmacies!

Not everyone's journey through life starts off completely smoothly and that is why, before moving into the new family home, there is sometimes a stay in the paediatric clinic. There, experts focus all their efforts on the little individuals developing in the best way possible, even if they come into the world prematurely, for example. With the MedicPro range, NUK has already been a trustworthy partner of the medical and nursing paediatric staff for a long time, with NUK Teats number 1 in German paediatric hospitals. For over 90% of German children's hospitals use NUK Teats*.

Now NUK is offering selected sterile products that are used in hospitals at pharmacies as well – as an aid for adjusting to life after a hospital stay and as a quick and sure solution when out and about or travelling. The range includes disposable bottles and teats: individually packed, sterile and ready to use. These products were specially developed for use in clinics, meet the highest hygiene demands and are "Made in Germany".
