

## Polychromos® Artists' Colored Pencils

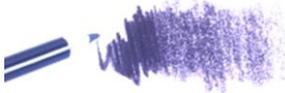

**Polychromos® Colored Pencils** are among the world's oldest and best-known colored pencils for professional artists.

*Product features:*

- Highest quality pigments produce bright colors with unsurpassed light fastness and permanence
- Thick, oil-based lead; water-resistant and smudge-proof
- Artist pencil with an extra-thick 3.8mm lead
- Patented, secure SV bonding process
- Environmentally friendly water-based varnish
- 102 of the 120 color range are rated with the 3 \*\*\* of light fastness

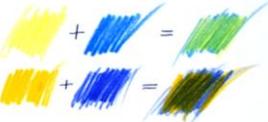

Polychromos® Artists' Colored Pencils are available in 120 open stock colors and in 12, 24, 36, 60 and 120 count tins, gift sets and wooden cases.

### Practical Demo Exercise #1

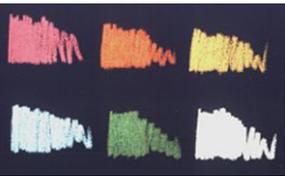

Use a dark colored pencil and color an area with a switch from light shading to intense color. For a light shade, hold the pencil very flat. For intense color contrast, hold the pencil almost vertical.

### Practical Demo Exercise #2

Draw different shades of different colors over each other. Hold the pencil at a very flat angle. Always work from light to dark color, so that the lines are visible and the colors are brilliant! Recognize how the colors can be mixed into each other without smudging.

### Practical Demo Exercise #3

Use bright colors on dark paper to demonstrate color opacity.
