Modelling tools	--	8711	1	
Oven thermometer	-	8700 02	1	

Smooth work surface (glass or ceramic), 1 kitchen knife for portioning

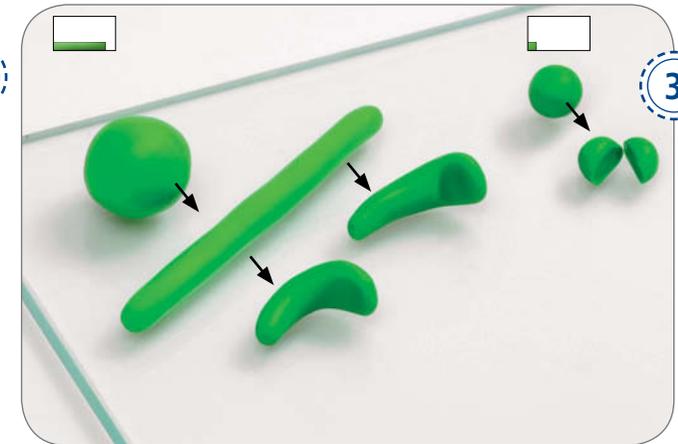

## Instructions for cute aliens.

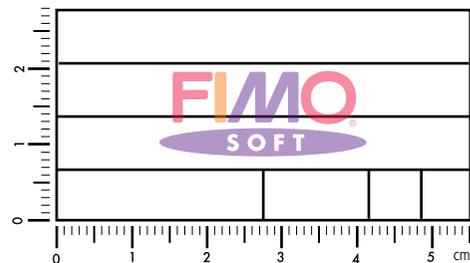

Make the body using the indicated quantity of tropical green FIMO soft (8020-53). To do so, you need to roll it to a ball first and then mould it into a skittle shape.

Using a modelling stick, form the mouth. It is important that you make deep holes for the eyes as this is where you will be adding the 'protruding' eyes later on. The same applies to the arms. Make small holes on the left and right to make it easier to attach the arms later.

Make a ball out of the indicated quantity of tropical green FIMO soft (8020-53) and then roll it out to an approx. 4 cm long sausage. Cut it in half and use the two pieces to shape short arms with. Make the eyes out of two small half-balls.

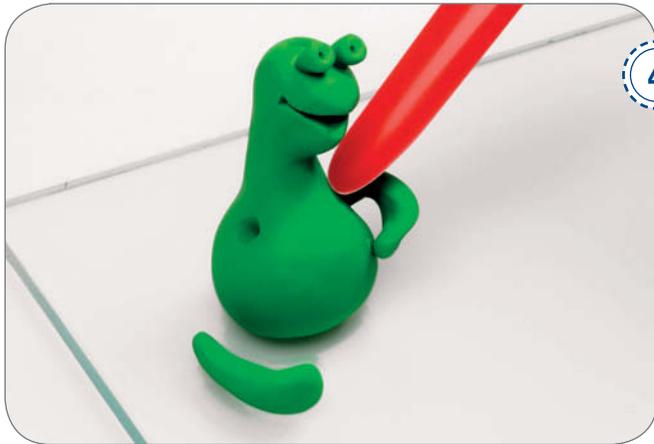

Thanks to the portioning aid, it's easy to cut your block of FIMO into the right portions.

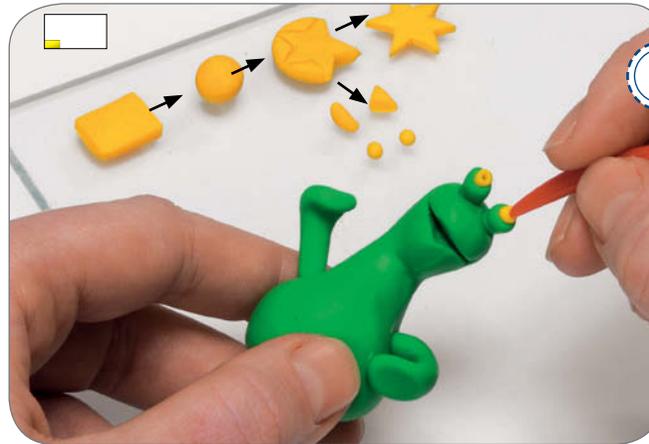

**Tip:**

Unfinished items and left-over bits of material can be stored in a sealed plastic bag or airtight container, e.g. a plastic box or jar.

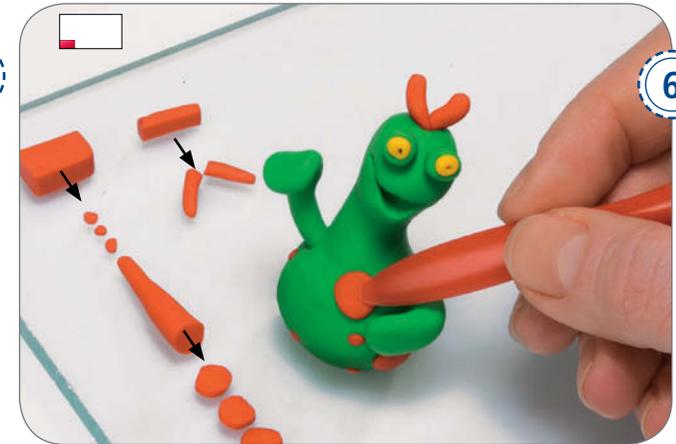

## Instructions for cute aliens.

Now press the eyes already made in step 3 carefully onto the head and attach the arms.

Shape a ball out of a small piece of sun yellow FIMO soft (8020-16) and then press it flat. Using a template or shaped cutter, cut a small star out of it. If you add a bit of yellow to the eyes, you can make your alien look even more galactic.

Shape a ball out of a small piece of sun yellow FIMO soft (8020-16) and then press it flat. Using a template or shaped cutter, cut a small star out of it. If you add a bit of yellow to the eyes, you can make your alien look even more galactic.
