Do-it

www.marabu-creative.com... for lots of tips, information and great ideas with colour

From Marabu you will need...

- Marabu-Do-it Colorspray, 150 ml, in dark violet (051), may green (064), orange (013), medium yellow (021) and rose pink (033)
- Marabu-Fix-it adhesive spray, 150 ml
- Marabu-Stencil "Flower Rosette" (014), 33 x 33 cm

...you will also need:

- Fruit crates
- Rubber gloves
- Newspaper to cover

Here's how it's done:

1. First cover the work surface using newspaper. Next remove safety rings from Do-it cans. For this, remove caps and spray nozzles, then gently lift and remove the red ring from outside using a screwdriver or similar. Put the spray nozzles and caps on the cans again and shake them well for 2-3 min. so that the colour pigments are thoroughly distributed.
2. Carry out a test spraying on newspaper first to ensure there are no solids in the valve. Then spray the crates evenly with Do-it (ideal spraying distance about 10-30 cm). Apply one or two further coats at 1-2 min. intervals after the first coat until a smooth even finish is achieved.
3. Now thinly spray stencil with Fix-it adhesive spray, allow to dry for a moment and then place it onto the crate. Spray a Do-it shade of your choice over the stencil. When the colour application is sufficient, carefully remove the stencil and allow the paint to dry.

Tip:

- The object must be dry and clean. For surfaces such as plastic, metal or wood we recommend Marabu-Primers. A primer not only covers small irregularities but also improves adhesion.
