

Fun ideas to make yourself

Sparkling candlesticks

From Marabu you will need...

- Marabu-Do-it Colorspray, 150 ml, in scarlet red (031) and silver (082)
- Marabu-Spray Nozzle Set

...you will also need:

- Empty bottles
- Rubber gloves
- Newspaper
- Plastic covering
- Screwdriver

Here's how it's done:

1. First clean the bottles inside and out and cover the work surface using newspaper or plastic.
2. Next remove safety rings from Do-it cans. For this, remove caps and spray nozzles, then gently lift and remove the red ring from outside using a screwdriver or similar. Put the nozzles and the caps on the cans again and shake the cans well for 2-3 min. so that the colour pigments are thoroughly distributed.
3. Carry out a test spraying on newspaper first to ensure there are no solids in the valve.
4. Then spray the bottles evenly. Start spraying beyond the bottles (from a distance of approx. 10-30 cm) and firmly press the spray nozzle whilst moving. Hold the can almost vertically and spray evenly backwards and forwards.
5. Apply one or two further coats at 1-2 min. intervals after the first coat until a smooth even finish is achieved.

Tip:

Spraying works best at room temperature (15-25°C). Ensure there is sufficient ventilation when spraying.
