From Marabu you will need...

- Transparent film DIN A4
- fun & fancy outline black (073), medium brown (046), amber (017), white (070), ruby red (038), flesh colour (029); rich green (067), yellow (019), light green (062)

Here's how it's done:

1. First put your design under transparent film and copy the outlines with black outline paint directly from the bottle. Allow the outlines to dry for 1-2 hours.
2. As soon as the outlines are dry, paint all inside areas with fun & fancy colours. Fill in right up to the outlines and do not leave empty spaces within the outline. Allow to dry completely (about 24 hours).
3. Then carefully peel off the motifs from the film and decorate wherever you choose.

Tip:

- Instead of painting the motifs onto transparent film, try using adhesive film. Once dry, leave on the film and cut out close to the outline. They will peel off even more easily this way.
