

This creepy cut finger is an easy special effect to create - and will definitely frighten your friends.

## EQUIPMENT REQUIRED

Special FX WAX

Special FX SPATULA

Special FX CAKE BLOOD

Special FX STIPPLE SPONGE

Special FX THEATRE BLOOD

OR

SPECIAL FX KIT with guide

1

Soften a small ball of Special FX Wax and apply to your finger. Using water, spread the edges to blend into your skin.

2

Using the edge of the spatula, make a cut in the wax - not too deep. NEVER use a knife to do this as you may really cut your finger!

3

Use the Stipple Sponge to dab Cake Blood or Bright Red face paint onto the wax.

4

Drip some Theatre Blood or Gel Blood into the cut and let it run down your finger!
