

Transform into a robot with this simple, but effective, design.

EQUIPMENT REQUIRED

METALLIC SILVER face paint

BLACK face paint

Hi-density sponge

Snazaroo Multi-purpose brush

1

Using a damp sponge dab on Metallic Silver paint down one side of the face, from the forehead to the lower cheek, to create a metal plate effect.

2

With Black paint & the brush, carefully draw an outline around the whole shape, adding dots as bolts. Create overlap sections by drawing right-angled lines and dots as bolts.

3

Using Metallic Silver paint and the brush, add highlights to the bolts by adding smaller dots on top. Highlight the edges of the metal plates by adding silver lines next to the black ones.
